

FVDI for TOYOTA-LEXUS Introduction

Version: V6.0

ABRITES Toyota/Lexus/Scion Commander is a professional software for diagnostic of Toyota/Lexus/Scion vehicles. It allows you to perform complete diagnostics of all 1995-present Toyota/Lexus/Scion models. It provides some unique functions, which are not supported by any other diagnostic tool.

Standard diagnostic functions:

- Read fault codes
- Clear fault codes
- Device scan
- Display of Actual Values
- Actuator Tests
- Custom Read/Write

Special functions:

Key Programming

- provides ability for reset of immobilizer or smart system of the vehicle, registration of keys and remotes

Transponder tool

- programming key by dump of smart system/immobilizer, identification of transponders, cloning of ID67, ID68, ID70 and Texas fixed transponders, ability for preparation of ID67, ID68, ID70

Dump tool

- wide range of options for resetting (renew) of different units (immobilizers, smart systems, engine control modules, instrument clusters) by memory dump. Supported are also latest immobilizers with encrypted memory

ID-box reset by LIN connection

ECU flasher - available for EDC15, EDC16 engine control modules
